REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the limitations reciting a method of sawing and trimming boards including steps of selectively placing boards, that are aligned against both lumber lines that are contiguous with a conveying path as claimed after passing through a saw, into a plurality of bins successively positioned along both sides of the conveying path as claimed in combination with other limitations set forth in claim 1 are not anticipated or made obvious by the prior art. It is noted that the term "against" is construed as being directly in contact and "contiguous" as uninterrupted. For example, Brandon teaches a lumber sorting and accumulating machine including a sorting mechanism with grade arms which selectively drop lumber units onto lateral conveyors that move the lumber units adjacent both sides of a conveying path to be deposited into selected accumulator bins. Brandon does not teach a method of sawing and trimming boards including the steps of selectively placing boards, that are aligned against both lumber lines that are contiguous with a conveying path as claimed after passing through the saw, into the plurality of bins successively positioned along both sides of the conveying path as claimed in combination with other limitations set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
